

Resetting Your Password

NocTel encrypts your login password for the NocTel Control Panel. Because of this, we do not have a record of your password in plain text that can be given to you if you have lost or forgotten your current password as requested via email or over the phone. If you forget your password, you must use the Password Reset Tool via the NocTel website's Login Portal.

1. Go to www.nocotel.com
2. Click the **Login** button on the top right of the page.

3. Click the **Forgot Password** link located under the Username and Password fields.

4. Enter the email address used when creating your user account.

Recover Your Password

Enter your email address and a password reset link will immediately be sent to you.

Email Address:
