Routing Numbers

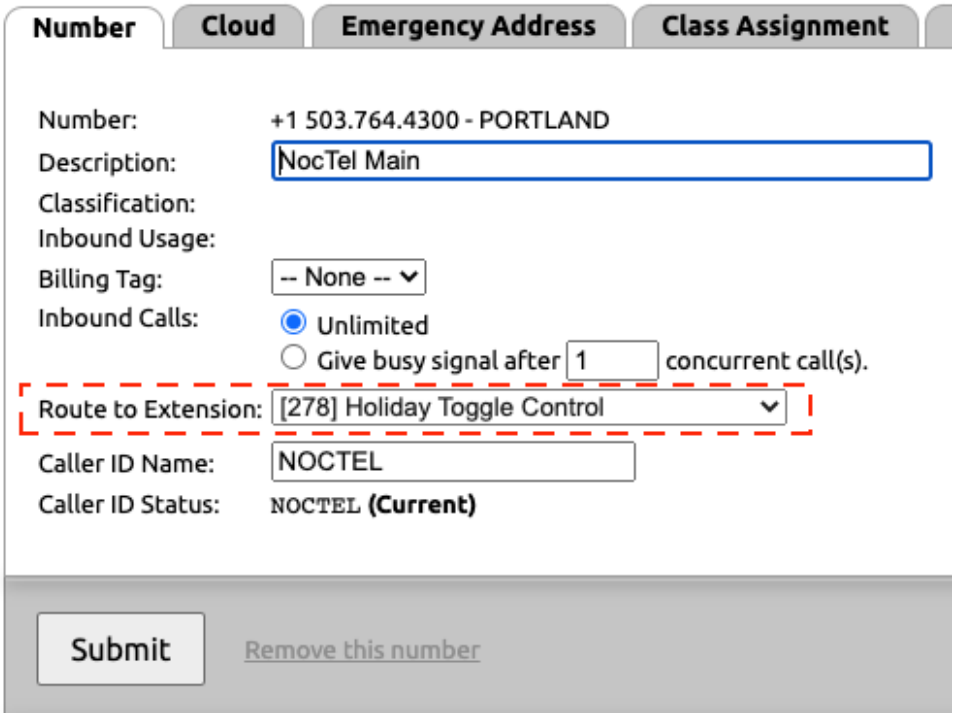

In order for an inbound call to an account phone number to be answerable, the number must be routed to and extensions in the account.

To route a number to an extension:

1. In the NocTel Portal, click **Numbers.**

2. From the list of numbers find the number that needs to be routed and click on it.
3. On the **Number tab**, locate the "**Route to Extensions**" dropdown box and use it to select an extension.

4. Click **Submit** to save the settings.
