

Watching TV Over NocTel Fiber

Many customers have questions about NocTel Fiber and TV/streaming services. This article will help answer some common questions on the topic.

No. NocTel Fiber only provides a Fiber Internet connection to your home. However, the internet connection supplied by NocTel Fiber allows our customers to signup and use streaming subscription services.

Yes! You can use online streaming services with your NocTel Fiber Service. All service plans offered by NocTel Fiber provide more than sufficient bandwidth for standard streaming services.

Yes. All service plans offered by NocTel Fiber provide sufficient bandwidth for HD/4K streaming services. Most streaming services recommend around 25 Mbps for HD/4K streaming. If your home will have multiple HD/4K streaming services going at once, you may wish to update to our 100 Mbps plan.

There are many options for streaming services that provide access to local and national news channels. Here is a list of some you may want to check out:

- AT&T TV (Now Directv Stream)
- Fubo TV
- Hulu + Live TV
- Sling TV
- YouTube TV
